Trading was small in volume, and fluctuations for the first time in a long while were narrow and unimportant, having been confined within a range of 4 to 5 points from last night's closing quotations. The improvement in prices was mostly the result of scattered buying and bull ort, and assence of much cotton the condition of the dry goods trade throughout New England, the heavy movement of the crop for the week and accumulations in the statistical po-sition at all points were the unfavorable features which tended to restrict buying.
